DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I, claims 1-18 in the reply filed on 10-30-2008 is acknowledged. The traversal is on the grounds that a search of all groups would not be burdensome. This is not found persuasive. Applicant points to MPEP 803 as the basis of his argument. However, in a 371 national phase application, Unity of invention is governed by Chapter 1800 (as per MPEP 823). In the previous action, it was clearly shown that the groups do not have the same special technical features such that unity of invention was lacking and that the requirement is proper. In addition, it is stated that a search and examination of the additional groups that include different technical features would be a serious burden on the examiner. The requirement is still deemed proper and is therefore made FINAL.

2. Claims 1-18 are allowed. The closest cited art—Avery and Hansen—fail to anticipate or render obvious, alone or in any proper combination, the pair of venturi chambers defined by said housing, one of said chambers operative to provide a co-current regeneration of said material and the other of said venturi chambers operative to provide a countercurrent regeneration of said media—in combination with all the other limitations of claims 1 and 10.

Note that the reference U.S. 4,889,623 cited in the specification, is now included on the attached form-892.
